

Dairy Products for Human Consumption

Export certificates for dairy products for human consumption must state that the country of origin is free of foot and mouth disease (FMD), rinderpest, contagious bovine pleuropneumonia, and African swine fever.

The VS Form 16-4 already contains this statement.

No additional statements may be included in the “ADDITIONAL DECLARATION” area of the VS Form 16-4.

The product name, number of packages, description of packages, and weight of the products must be included in the “PRODUCT” box.

Shelf-stable and highly-processed products may not require certification- exporters should have their importers confirm with Taiwanese authorities prior to shipment.
